Start Date:	1/1/2023	End Date:	04/29/2023		Supplementary Months:		November and December 2023	
Establish an EXPECTED baseline for determining if your ACTUAL progress is on track, behind or ahead of schedule								
Roadmap:								
Does not align with sprints								
Timeline start to finish of project								
Identify major milestones								
Identify what needs to be done by those milestones								
Project Plan:								
Identifies risks				idea of actual velocity and amount of work needed to get done				
Develops risk mitigation solutions				summary project as a whole				
Gant chart portrays critical pathways				Total sprints				
Estimate sprint capacity of team				Total hours per sprint				
gant chart plans out sprints based on sprint capacity				Length duration of each sprint				
List functionalities and their effort points				summary of estimation of complexity and effort points				
Identify when BRD will no longer be a living document				BEWARE gant chart usually has issues with dependencies AND/OR overwork
